ONLINE CINEMA BOOKING SYSTEM

GTKY Creatives

BSIT 2021

PERSONA 1: Navarro

Student
Mandaluyong City,
20 years old, Single

User Story

Reshami wants to watch Spider-Man with her sister. She books on a known cinema app because it is fast and lets her pick seats beside her sister. She screenshots the QR code to show at the entrance, so she skips the ticket booth line.

Goal

- *Seats beside her sister*
- *Show QR ticket at entry*

Feeling Uneasy

- *Cinema may be too cold*
- *Hopes to share a jacket*

Scenario

Reshami and her sister are about to enter the cinema to watch Spider-Man. She booked their seats side by side on the app, and her QR ticket is ready. But she forgot her jacket, and the cinema is usually very cold. She asks her sister if they can share her jacket during the movie.

PERSONA 2: Abon

Student
Pasig City,
19 years old, Single

User Story

Bea wants to watch 100 Awit Para Kay Stella with her sister. She looks for a cinema site that books quickly and reserves days ahead for a promo price and still showing in cinema. The e-ticket is sent to her email.

Goal

- *Screenshot the e-ticket*
- *Show it at the entrance*

Feeling Uneasy

- *May have no signal*
- *Traffic may make her late*

Scenario

Bea is going to the mall to watch 100 Awit Para Kay Stella with her sister. Heavy traffic makes her a little late, and she forgot to screenshot her e-ticket. The signal inside is weak, so she cannot open the email. Without the ticket, she may miss the start of the movie or be unable to enter.

Project Drivers

Purpose

- Automatic ticket booking and better management
- Make cinema ticket booking faster and more efficient

Stakeholders

- Admin
The person in charge of maintaining the system
- Booking Staff
Cinema staff who manage the booking operations
- Customers
Moviegoers who use the system to book tickets

Project Constraints

- Mandate Constraints
- Naming Conventions & Terminology Relevant Facts & Assumptions

Project Constraints

Standardized Constraints

- Viewers must meet the film's age rating
- Tickets sold cannot be more than the seats in the cinema
- Showtimes are limited to a set schedule each day

Naming and Terms

- Booking, Ticket, Seat
- Showtime, Cinema, screen
- Customer, Staff, Admin
- E-ticket, Booking No.

Facts and Assumptions

- Customers have internet and an email address
- Every cinema has a fixed seat count
- Prices are in EGP

Customer

Functional Requirements

Login and Registration

To book a ticket, a customer needs an account. If they do not have one, they can register. This keeps the system secure.

Search a Movie

The system has a search function so users can find the movie or show they are interested in.

Seat Availability

Users can choose the seat they like and see whether it is available or already taken.

Ticket Cancelling

A customer can cancel a ticket up to one hour before the movie, with a small fee.

Functional Requirements

Multiple Payment Options

The system accepts different payment methods such as PayPal, e-wallets, cards, and vouchers.

Ticket Generation

After booking, the system makes a PDF ticket and emails a copy to the customer as booking confirmation.

Movie Management

Admin can add, edit, and remove movies or showings.

Nonfunctional Requirements

Look and Feel

- User-friendly
- Engaging and pleasant to use

Usability and Humanity

- Learnability: easy to remember, navigate, and use

Performance

- Error tolerance
- Efficient and effective

Operational and Environment

- Portability: works in any browser or device
- Availability: runs day and night
- Accessibility: access limits and multi-language

Project Issues

No. 642571

Project Issues

Open Issues

- Many movie and showtime choices
- Struggling with internet
- Refund and cancellation policies
- Coordination issues

Off-the-Shelf Solutions

- Online reservation systems
- Online booking engine
- Online booking software

Tasks

- Slot management - close bookings
- Customer booking cancellation
- Price per showtime slot
- One platform, many booking types

New Problems

- Transactions may be interrupted by a poor connection
- Poor seat inventory management

Project Issues

Migration to the New Platform

- Moves data from the system to a new application, OS, or cloud

Risks

- A hacker could copy data to his own system and make unauthorized transactions and fund transfers

Costs

- Ranges from PHP 10,000 to 100,000
- Also depends on requirements and other software cost factors

User Documentation and Training

- Double bookings
- Handling customer complaints

Project Issues

Waiting Room

A feature that controls the flow of customers so online booking stays smooth, especially when a big movie opens.

Ideas for Solutions

- Data recovery
- System maintenance
- Anti-malware software
- Other fixes for project issues

7 Product Dimensions

1. User

- Admin
- Staff
- Customers

2. Interface

- Flexible design
- Smooth layout flow and navigation
- Image resolution and sizes
- Readable text

3. Actio

- Search for bookings
- Back and previous buttons
- Links to confirm a booking

4. Data

- Movies and cinemas
- Dates and showtimes
- Names of bookers
- Tables

7 Product Dimensions

1. Control

- Booking rules and regulations
- Cinema policy
- Valid IDs for age-rated films

1. Environment

- Online, used through a browser
- Works on any device with internet

1. Quality Attribute

- Usability
- Accessibility
- Security
