Motor Taxi Prototype

Book a ride in a few taps

BOOK NOW!

OBJECTIVES

Objective of the activity

To design, prototype and plan an interactive app for booking motorcycle and car rides. It should let passengers set a pickup and drop-off, see the fare upfront, track the rider live and ride safely, while giving riders a fair, steady flow of trips.

About the app: Ride It

Ride It is a ride-hailing app in the spirit of Move It and JoyRide. It beats traffic with quick bike taxis and offers car rides when you need space or shelter.

LIVE MAP

See nearby riders move in real time.

UPFRONT FARE

Know the price before you confirm.

SAFETY TOOLS

Verified riders, SOS and trip sharing.

CONCEPTUAL MODEL

User Interface

App header, profule, menu, saved places

Set the Trip

Pin pickup, type drop-off, choose Bike or Car

Fare and Matching

Fare quote, ETA, nearby rider list

Book Ride

One-tap Book Now, rider is matched

Live Tracking

Rider moves on the map, route and ETA

Safety Tools

SOS, share trip, call and chat

Notifications

Matched, arriving, arrived, receipt

Pay and Rate

GCash, card or cash, then rate and tip

Index Card Prototype

Login/Sign up

Phone number and OTP

Where to?

Type drop-off or drag the pin

Choose Bike or Car

Compare ride types

See fare and ETA

Fixed price shown upfront

Tap Book Ride

Rider is matched with photo and plate

Track and share

Live map, SOS, share trip

Pay

GCash, card or cash

Rate the ride

Receipt and tip

STORY BOARD

Scene 1: Opening the App

Action: User opens the app and logs in.

Scene 2: Setting the Destination

Action: User types the drop-off or drags the pin on the map.

Scene 3: Choosing a Ride

Action: User compares Bike and Car and sees the fare and ETA.

Scene 4: Booking the Ride

Action: User taps Book ride to confirm the trip.

Scene 5: Rider Matched

Action: App shows the rider's photo, name and plate number.

Scene 6: Live Tracking

Action: User follows the rider on the map and shares the trip.

Scene 7: Rider Arrives

Action: App notifies the user that the rider has arrived.

Scene 8: Paying for the Ride

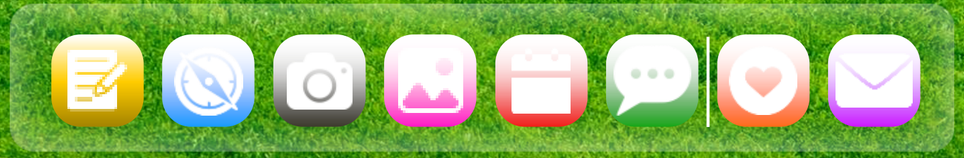

Action: User pays GCash, card or cash.

Scene 9: Rating the Ride

Action: App prompts the user to rate the rider and add a tip.

Feedback Collection

Question for users:
“Is this process clear and intuitive?”
“Would you change or add anything?”

INTERFACE

Login/Sign-up

WELCOME

OPEN THE RIDE IT APP AND SWIPE THE “GET STARTED” PROMPT TO THE RIGHT TO BEGIN

LOGIN

ENTER YOUR REGISTERED EMAIL OR PHONE NUMBER AND PASSWORD.

SIGNUP

CREATE A NEW ACCOUNT BY FILLING IN YOUR DETAILS AND AGREEING TO THE TERMS.

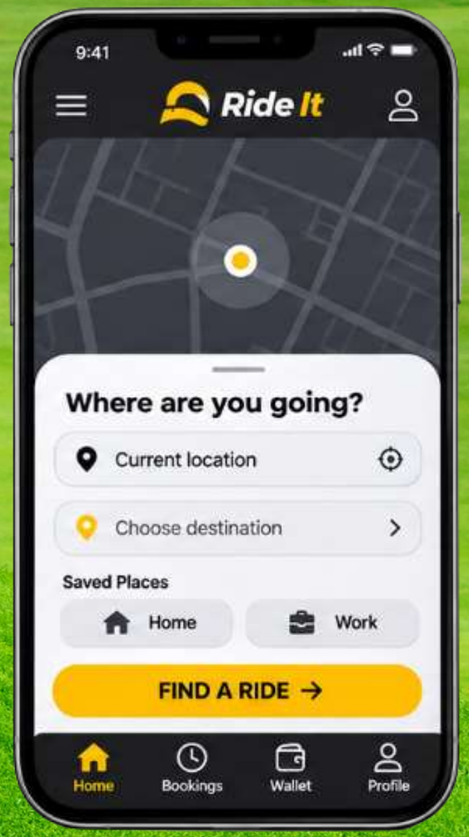

INTERFACE

Verification/Booking a Ride

VERIFICATION

ENTER THE 6-DIGIT OTP SENT TO VERIFY YOUR MOBILE NUMBER.

HOME

SET YOUR PICKUP LOCATION AND DESTINATION ON THE MAP.

SET PICKUP / DROPOFF

REVIEW YOUR PICKUP AND DROP OFF LOCATIONS AND CONFIRM TO PROCEED WITH THE BOOKING

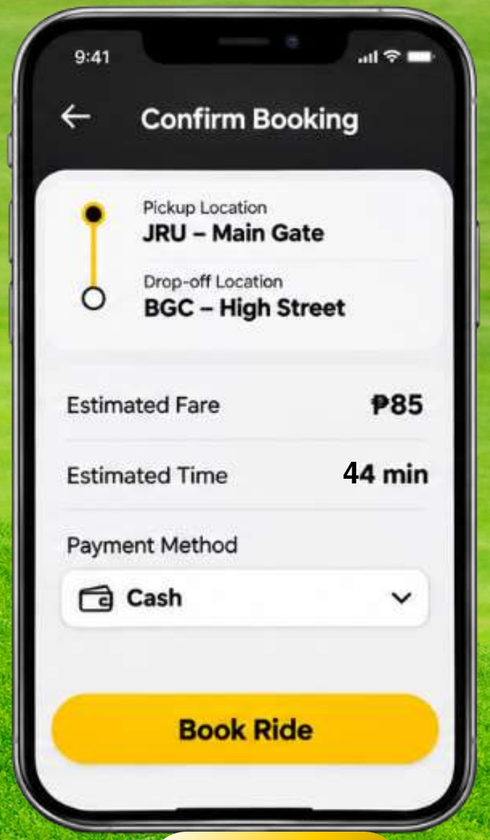

INTERFACE

Request & Match

CHOOSE RIDE

COMPARE RIDE OPTION, ETA, AND ESTIMATED FARE.

CONFIRMATION

REVIEW ROUTE AND PAYMENT BEFORE BOOKING.

FINDING RIDER

RIDE IT SEARCHES FOR AN AVAILABLE NEARBY RIDER.

INTERFACE On the ride

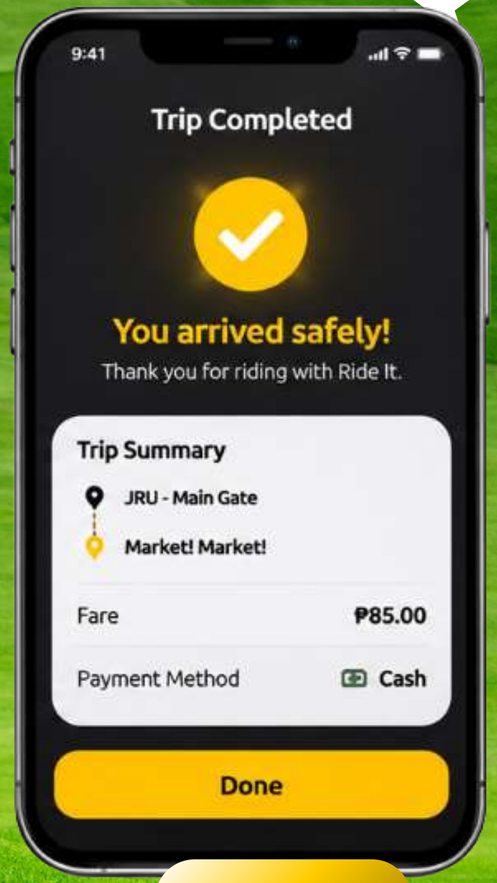

RIDER MATCHED

A NEARBY RIDER IS ASSIGNED TO YOUR BOOKING. VIEW THEIR DETAILS AND ETA.

TRACKING

MONITOR YOUR RIDER'S REAL-TIME ARRIVE AT YOUR DESTINATION AND LOCATION AND TRIP PROGRESS. SEE YOUR TRIP SUMMARY.

TRIP COMPLETED

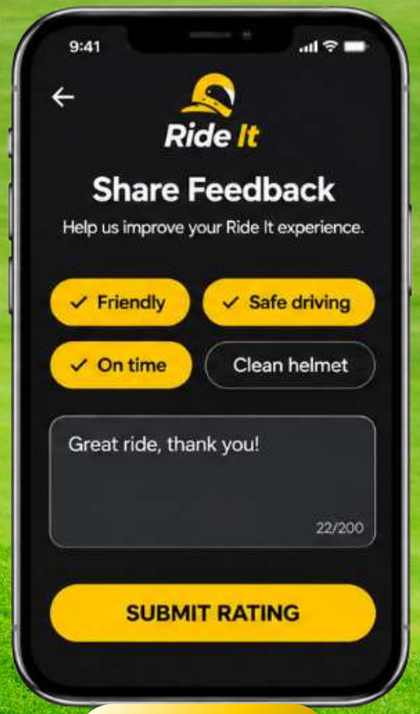

ARRIVE AT YOUR DESTINATION AND REVIEW YOUR TRIP SUMMARY

INTERFACE On the ride

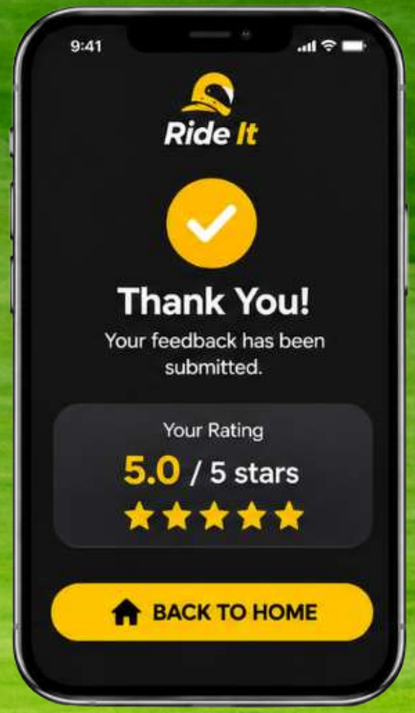

RATING

SELECT A STAR RATING FOR YOUR DRIVER

FEEDBACK

LEAVE OPTIONAL COMMENTS OR FEEDBACK ABOUT YOUR RIDE

SUBMISSION

RETURN TO THE HOME SCREEN AND CONTINUE USING RIDE IT

Experience Map: Reshami Navarro

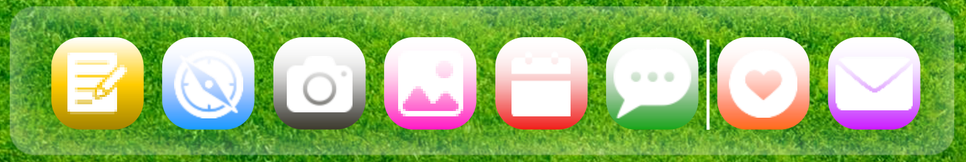

Persona 1 · Passenger, 20 years old, college student

	Awareness	Booking	Sign-Up	*Effectiveness*	*Regular Use*
User actions	Stuck in traffic at 8:40 with a 9:00 class, she looks for a faster way.	Types her campus, compares Bike and Car and taps Book ride.	Finds Ride It in the app store, checks reviews and signs up.	Follows Jun on the live map, shares her trip and arrives on time.	Books for her daily commute and late trips home.
User needs	A quick, affordable ride when time is short.	Fare and ETA before she commits.	A trusted app with an easy sign-up.	To feel safe and to arrive on time.	A familiar flow with saved places and GCash.
Process and channels	Checks her schedule	› Sets drop-off › Picks Bike	Browses the app store	› Tracks the rider › Pays by GCash	› Taps save Home › Rates the ride
Opportunities	Campus promos and referral codes	› Landmark note and photo for pickup	› Quick OTP sign-up › Short tutorial	› Alert a trusted contact if the trip stops	› Student discounts › Loyalty points

Experience Map: Kent Morico

Persona 2 · Rider, 20 years old, college student/part-time

	Awareness	**Onboarding**	**Going online**	***Effectiveness***	***Regular Use***
User actions	Hears from fellow riders that Ride It offers steady trips.	Applies, uploads his license and plate and passes checks.	Goes online at rush hour and accepts a short nearby trip.	Finds the pickup, follows the route and gets his payout.	Stays online every day during peak hours.
User needs	More trips and steadier income.	A clear and quick approval process.	Short, fair trips and a clear pickup point.	Turn-by-turn directions and a fair payout.	Predictable earnings, fewer cancellations.
Process and channels	› Talks to other riders	› Uploads documents › Waits for approval	› Goes online › Accepts a trip offer	› Calls or chats › Rides the route	› Checks earnings › Collects tips
Opportunities	› Sign-up bonus and fair commission	› Show approval progress	› Show fare and landmark before accepting	› In-app call and chat › Tips as a bonus	› Weekly bonuses › Fair cancellation rules

Ride It vs. maker-movement apps

Aspect	Typical maker project	Ride It
Purpose	Personal tinkering and learning	A public transport service
Build	Arduino or Raspberry Pi, DIY parts	Cloud backend with passenger and rider apps
Users	The builder is the user	Two sides: riders and passengers
Reliability	Works on the bench	Real-time GPS and matching, all day
Safety and rules	Rarely a concern	Rider checks, insurance, transport regulations
Lifecycle	Maintained by its maker	Support team, updates, payments and payouts
